Dreamweaver: Me Website
Multimedia I

LEARNING OBJECTIVE(S)

- Use Dreamweaver to create a website with four (4) HTML pages about you, your family and your friends.
- Focus on creating **Unity** with your pages through **Color, Emphasis** and **Balance**.

GETTING STARTED

1. Create a new folder on your device named "Me Website" and also create a sub-folder titled "images".

2. Save all of the images you want to use into your "images" folder. Using Photoshop, choose <u>Image ></u> <u>Image Size...</u> to resize your images to make them smaller - make sure the resolution is 72 pixels/inch.

3. Create a new HTML (HTML 4.01) document in Dreamweaver and save into your folder as "index.html". Choose <u>Site > New Site...</u> to create a new site for this assignment.

4. Using <u>Design view</u> in Dreamweaver, design your webpage to include the <u>requirements</u> listed below.

5. When your webpage is complete, navigate to the folder on your device. Right-click on the folder that contains your website and choose <u>Send to > Compressed (zipped) folder</u> *(this will create a single ZIP file that contains the HTML document and images for your webpage).*

6. Upload the ZIP file to CANVAS.

REQUIRED

- ✓ All **font** must be formatted with **CSS**
- ✓ At least one (1) **rollover image**
- ✓ At least one (1) **external link** to another website
- ✓ At least one (1) **email link**
- ✓ At least one (1) **image** on each page
- ✓ At least one (1) **table** on each page
- ✓ **Background** (color or image) on each page
- ✓ **Navigation** (links to all other pages) on each page
- ✓ Four (4) HTML pages:
    - **index.html** (your home page)
    - **me.html** (page about you)
    - **family.html** (page about your family)
    - **friends.html** (page about your friends)
        >> *Additional pages are optional*

Dreamweaver: Me Website
